## PROJECTS

1. *Course Selling Platform*: Developed a full-stack course selling application using React.js, Node.js, Express.js, and MongoDB, allowing instructors to upload courses and learners to purchase them with role-based authentication. [\[View Live\]](#)
2. *Scratch (Full-Stack Note-Taking App)* – Developed using JavaScript, Node.js, Express, HTML, CSS, DynamoDB, and deployed on Netlify; built client-server architecture with user authentication and a clean, responsive UI for efficient note management. \_\_\_\_\_
